

# MOVABLE SOILBUNKER WITH BEARING SWIVEL

The movable soilbunker is a transport/processing-system to supply the soil to the soilworkingmachine on an economical and clean way.

## OPERATION:

The movable bunker is a flexible solution and suitable for handling of loose soil, Big Bags or special small packages. The soilbunker can be connected to a soilworkingmachine for instance a pottingmachine. As soon as the soilworkingmachine will ask for soil, the bottom conveyor will bring the soil to the machine. For gradual and automatically soil dosing be can mounted by a sensor and controlling.

## THE MACHINE HAS FOLLOWING DISTINGUISHING FEATURES:

- High-quality construction and maintenance free
- Frame galvanized
- Clean, labourfriendly working by a closed soilsystem
- Optimal working of the connected soilworkingmachine with automatically dosing by means of a sensor (option)
- Easy control as well automatically as manual
- Possibility to deliver lengthened construction with a bigger capacity
- Built in accordance with the CE-norm
- Thermic protection and emergency stop

## TECHNICAL DATA:

Length	: 3.000 mm.
Width	: 1.400 mm.
Height	: 1.900 mm.
Outflow-height	: ± 800 mm.
Outflow-width	: ± 600 mm.
Capacity	: ± 3,0 m <sup>3</sup>
Weight	: ± 300 kg.
Connection power	: 0,75 kW.
Power supply	: 3ph./400V.50Hz + N + ⚡
