

BALE-BREAKER

The bale-breaker is developed to restore the originally capacity of the pressed bales.

OPERATION:

The bales will be stripped via the cutting-board from the packing-material and brought to the input-side in the bale-breaker. The to be mixed material is brought per charge into the bale-breaker, this can happen as well as on the input-side as well as on the upperside. After the input of mixture or mixtures the bale-breaker will be closed on the input- and outside, if necessary water can be dosed. The mix will be started after the desired mixtime the bale-breaker will be opened on the adjustable outside and the mixture can be dosed in for instance a handling-machine. The bale-breaker is provided with a solid chain with drivers for a optimal mixresult.

THE MACHINE HAS FOLLOWING DISTINGUISHING FEATURES:

- Top-quality construction and low maintenance
- High mixcapacity
- Available for many mixtures and packing-forms
- Easy to operate
- Movable construction
- Equipped with bale-cuttingboard
- Built accordance with the CE-norm

TECHNICAL DATA:

Length	: 3.100 mm.
Width	: 1.300 mm.
Height	: 2.150 mm.
Content netto	: 1m ³
Weight	: 650 kg.
Connection power	: 4.0 kW
Power supply	: 3 ph./300V.50 Hz + N + ⚡
