

FLORAL SLEEVELABELER

Machine to apply labels quickly and precisely on the same place for example on barcode-labels or plant- and flowersleeves.

OPERATION:

The roll of labels is placed on the rollholder, the labelling-track goes via a tension pulley and a forksensor to the dispensertongue, this dispensertongue applies the labels at the setposition on the sleeve. The label is pressed on more securely by a spring-mounted brush.

Every time a new sleeve package will be placed and clamped on the machine. The sleeves are lifted up one by one by means of a vacuum and brought underneath the labeler and turned over. The machine will stop automatically when the package of sleeves is finished. The labels can be stucked on the sleeves on every chosen position.

THE MACHINE HAS FOLLOWING DISTINGUISHING FEATURES:

- Stand-alone machine
- Totally electro-mechanical operation so there will be no press-air needed
- Capacity to 3.000 labels per hour
- Labels will be applied very precisely on chosen position
- Simply adjustable for different label- and sleevesizes
- Movable, equipped with two brakewheels
- Machine stops automatically when there are no more sleeves
- Suitable for every type of sleeve and label
- Easy operation
- Built in accordance with the CE-norm

TECHNICAL DATA:

Length	: 2.160 mm.
Width	: 2.260 mm.
Height	: 1.680 mm.
Weight	: 200 kg.
Capacity	: till 3.000 per hour
Connection power	: 3 kW
Power supply	: 230 V. 50 Hz.
