

HETO PAPERPOTPAPER

Paperpotpaper is a high-quality product which is developed after years of intensive development, final result is an unique homogeneous product for an optimal start of the production. In combination with the optimal soil the foundation is made for a production without concessions.

The plugs are without limitation suitable for automatic handling for example plant-robots, also very suitable for manual handling.

The paperpotpaper is developed for the HETO paperpotmachines but is also suitable for production of plugs on almost every other machine.
